Photoshop is an image-editing program that includes many tools, such as filters and layers, that make it possible to edit a picture. Photoshop CS4 What is Photoshop? The original versions of Photoshop enabled users to create digital images and then insert text, shapes, and other objects into images. But the latest version, Photoshop CS4, now allows you to design and animate 3D objects and to add video clips to your images. Additionally, Photoshop CS4 also has the capability to edit video and audio clips as well as to create animations and short movies. To see everything Photoshop can do, check out the videos below. The program has also become a powerful tool for designers. Want to create a logo or site design? Photoshop is a good way to go. Adobe's total licensing costs for software is listed at $345 per employee for one copy of Photoshop CS4. Why Photoshop? When you need to create a digital image, you have a few options. You can use a digital camera to take pictures, or you can use a scanner or other imaging device to take images. What's more, Photoshop makes it possible to create images with a mix of pixels. This is called "pixel-based" imaging. You can create and manipulate these new "pixel" images using the tools of your choice. This also means you can create all sorts of graphic images. For instance, you can use Photoshop to convert pixels into vector images. Thus, you can trace a shape and then convert it to a shape that can be edited or manipulated as needed. Adobe Photoshop It's not hard to find a complete, inexpensive Photoshop package for your PC. And, if you're making a template for clients, you can use Photoshop to create those images. To learn more about how to use Photoshop, we recommend one of the many Photoshop tutorials available on the Web. You can find tutorials that teach you how to use the programs specific tools, such as how to make a basic sketch, how to create a simple logo, and how to use the Paint Bucket. Adobe offers two different Photoshop CS4 software packages: The Creative Cloud and the Extended Suite. The Creative Cloud includes the same tools as the Extended Suite, but in a subscription-based plan. Read our article on the Creative Cloud to learn more about this model. I have set system monitor to only show "CPU", however I noticed that this is not so useful for me as it doesn't show the CPU usage for the individual processes. Are there any tools, even just in the command line, that can show me the usage for all processes, grouped by which process is consuming the most? A: You can do this. Lets assume you have 10 processes id 1 - 10. To list all processes running on current host, run this : ps aux | grep -o '\ ' To list them by CPU% per pid. ps aux | grep -o "| awk '{ print $1, "%.2f%"}' To list them with cpu+mem. ps aux | grep -o "| awk '{ print $1, ($2-0.1*$2) "%.2f%"}' A: Not in the default Ubuntu distribution. However, you can run: top -b to show the processes in a bar graph. More information can be found in man top. A: This tool will give you a graphical representation of your processes' resource usage. The CPU usage displayed will be for the listed processes, as well as the CPU time spent in the listed processes (measured in milliseconds). L.A.
