Lastly, you will learn how to add text and paint using the various options available in Photoshop. You will also learn how to work with layers, specifically how to combine them. You will also learn how to edit the size and placement of objects using the Rectangular Selection Tool. Adobe Photoshop has many

Effect of repeated d-amphetamine administration on the acquisition of bar-pressing and conditioned responding in a food reinforced operant task. The effect of repeated injections of d-amphetamine (AMP) on the performance of bar-pressing and conditioned responding in a food reinforced lever pressing task was examined in two male albino rats. The number of bars pressed during daily sessions was reduced

under AMP, but the number of pellets received was not affected. AMP treatment had a different effect on conditional discrimination in two separate experiments. In the first experiment only one of the rats showed generalization between the food contingency and the lever pressing under AMP, the number of pellets received increased in comparison with the control group. In the second experiment there was a generalization, although partial, in both the

treated and the control groups in the number of pellets received.

Administration of AMP under the same conditions also had a different effect on the acquisition of a two-way food-refractory response: the number of pellets received in the active chamber increased, while in the control group there was no change in the number of pellets received in the second-day session.

Administration of AMP decreased bar-pressing but increased avoidance of the active chamber.

In the control group, a similar effect was observed but the changes in performance in the two groups did not differ. It was concluded that AMP exerts different effects on the acquisition of operant responding, conditioned and two-way food-refractory responding and that in behavioral processes connected with food reinforcement different mechanisms are involved.) in his first season as head coach of the Browns, from 2007–2013. However, this season marked the

first time that the Browns played a home game at the Browns Stadium (albeit temporarily) since their move to Baltimore in 1996. The team finished the season with a 4–12 record, tying for the worst record in the league and marking the first time they had missed the playoffs since 2002. Ed Reed (2002–2005) Ed Reed was the primary starting cornerback for the Browns from 2001 to 2005. He was named the Most Valuable Player for the 2002 season after intercepting 10 passes. In addition,

Reed won two Super Bowls with the Baltimore Ravens, in 2000 and again in 2012. Jason Campbell (2010–2012) Like Jason Campbell, the quarterback who succeeded him as quarterback of the Cleveland Browns, Brandon Weeden has multiple franchises on his résumé, most notably the Dallas Cowboys. Q: Making image caption bleed

into one side of image I'm trying to create simple image gallery. This is basically what I'm trying to make: I'm having issues with centering. The caption should be centered within the image but on the left border of image (see diagram). My code so far: My CSS: `.main{ width: 100%; height: auto; margin: 0 auto; display: block; text-align: center; } a{ color: white; text-decoration: none; font-size:14px; } .main img{ display: block; text-align: center; margin: 0 auto; text-align: center;`

} What I'm trying to do is align the caption to the left edge of image.

Any help appreciated, thank you

A: How about adding this css?

```
.caption:before { content: " ";  
display: block; margin: 0 auto;  
height: 100px; width: 100px; }
```

A:

text-align: center; will center it within the element, but you need to set the element's background to see the image. If the image is an tag, then you also need to give it a display: block; so that the image is displayed as a block element.

Thus: .main img { display: block;

text-align: center; } See: Q: rails
