A: So I did a lot more digging into this, and there is a ton of steps for this, but I will try and summarize how to do it. Create a folder on your harddrive called: C:\temp Download Google Drive to your harddrive by choosing the option "Download to my computer." Once downloaded to your desktop, create a shortcut to it, and put it somewhere it is easily accessible (not your desktop, but actually a folder you know you will be using in the future). Open the shortcut, you will see a password, follow the directions after it, and it will open a folder. Navigate to the Google Drive folder. Open all the.zip files inside the folder. Once they are all open, navigate inside them, until you find one with a.dll extension, say for instance amtlib.dll Right click on it and choose "Open with" and select Notepad Type in the password you see when opening the shortcut, and paste it into Notepad, and save it into your desktop. It should be saved as: "C:\Users\YOUR\_USERNAME\Desktop\amtlib.dll" Open up Notepad again, and double click on the file. Once you have the file open, there is a lot of code. If you paste a.dll into the middle of the file, you can skip the code that says "GodMode9 saved the file." You should see a lot of comments with the highlighted words below. If

---

you see something in bold or underlined with a green box around it, it means it is an important statement. Write down these statements on a piece of paper. Select everything in the code, starting with "Please select or drag and drop," and copy it. Go to the Photoshop tab in Google Drive, and click on "Create a new document." Paste all the code into this document, and name the document "Crack Adobe Photoshop CC 2014 for Windows." Right click on it, and select "Send to:" In the text box to the right of this, write in the file name and location. Select the file and click the "Send" button. You should see the file downloading a few moments later. Once it is done downloading, click the "X" at the top-right corner of the window. On the top-left corner, click on "More" -> "Add a
