In FIFA's 22 years since debuting on the PlayStation, it has become the most famous and successful sports simulation game on the planet. EA Sports takes this massive experience, and with the guidance of an all-star team of football experts and players, creates a unique experience for FIFA.

Player Intelligence: With a full-scale sample of the real world players, FIFA 22 delivers more realistic player control and reactions. **Reinventing the World's Game:** FIFA 22 debuts a number of game-changing features, including the all-new 'Shot Meter,' a true to life contextual targeting system, an all-new ball physics engine and the introduction of the 'Offside-Line' marking a move away from the default earlier 'Offside' system. In addition, FIFA 22 introduced 'Dynamic Difficulty' and 'Scrum Bites' for the first time in the series. **Player Manipulation:** Adding an incredibly deep and organic feel to the FUT experience, FIFA 22 introduces an all-new 'ball control' system. Players can choose between 'Big Match Control' or 'Big Game Control.' In Big Match Control, players can control any player on the pitch. In Big Game Control, players can control the position of any player on the pitch. **Contextual Abilities and Hot Skills:** The redesigned Hot Skills system introduces a new contextual system that allows players to learn different game mechanics on the fly. Meaning, a player that picks up 'Aerial Threat' can now play as a defender, a goal-keeper or an attacker all in the same match. **Tactical Precision:** Smarter control, more advanced formation planning and more meaningful call-ups make up the deep advancements in football tactics built into FIFA 22. This includes new methods to manage your pitch at any time with the introduction of 'Pitch Adjustments.' **The Formation System:** New formation options give every manager access to the ultimate setups to play in FIFA 22. This includes creating a 5-3-2-2, 4-3-3-2, 4-3-3-1-2 and 4-1-2-1-2. **Complete Player Care:** Every off-the-ball activity, including passing, shooting, dribbling, off-the-ball positioning, positioning and all in-possession skill

Make history this year as the FIFA World Cup shifts to a truly global stage. I don't want to pay anything more than \$60. The price of these things is going up, and I refuse to spend \$80 or \$100 on games. I rarely buy games on sale or impulse buy games, but I do go to Gamestop and Ebay for deals. So if a game is on those two sites that would be a better price for me. I mean if FIFA 20 came out 2 months from now and it was \$60 I would buy it, because its the same game just a new number on the box. I would think for the average gamer the price is close to \$80 on average, but a lot of people are willing to pay more, and I can understand why. In my last post I said that FIFA 20 will be 30% cheaper than FIFA 19.

While there have been many, many FIFA video games over the years, FIFA 16 is the latest entry in the franchise and the successor to FIFA 15. It's the first FIFA game to be released on PC, Xbox One, PlayStation 4, Nintendo Switch, and mobile platforms, as well as the iPad, iPhone, and Android. Released only a couple of weeks ago in Europe and a couple of months ago in North America, FIFA 16 marks a new chapter in the game's history, and a change in scope for the series. The main aim of this new game is to make the experience of playing a FIFA game more immersive than ever before, especially for the new generation of consoles. With FIFA 16, the team behind the game has implemented a new performance engine that makes the whole game feel more realistic. The engine not only helps to make players look more realistic, but it also makes gameplay more fluid and responsive, along with better reactions on the pitch. In addition to this, the new graphics engine used in FIFA 16 makes it easier for players to see the game's beauty and detail on a wide range of devices, from TVs to phones and tablets. FIFA 16's new graphics engine can be seen in the new lighting technology that allows the game's environment to react properly to the team colors and position. New menus and HUD The new FIFA 16 has a new HUD (Heads-Up Display) and an improved in-game menu that makes it easier for players to switch between modes and menus. A brand new mode has been added in FIFA 16 for players who want to learn the game and kick off their own career. The new career mode lets players create their own player from scratch and play with that player in any of the game's different modes, including a new Career Off Season mode. Improved ball physics The new FIFA 16 is also powered by a newly developed physics engine. The engine allows players to control the match feel even better on the big screens and smaller devices. Other important improvements in this new game include more than 28,000 new animations for all players and teams, improved player attributes, more user-interface updates, new kits, player likeness, and new player cards. The new cards for players in FIFA 16 now have more advanced graphics, as well as more details and new features. Key highlights: New era of FIFA innovation
